<212> PRT
<213> Unknown Organism

<220>
<223> Description of Unknown Organism: unsure

<400> 3
His Phe Arg Trp Xaa Lys
  1               5

Several errors appear above.  Please change the <213> response to just
"Unknown," (per 1.823 of the Sequence Rules).  Please try to give more
information in the <223> response, explaining "Unknown."  Please explain
the "Xaa" in location 5:  which residue(s) does it represent?  Per 1.823
of the Sequence Rules, all Xaa's and all n's (in a nucleotide sequence)
need explanation in the <220>-<223> section.  Please give the source of
the genetic material.  See sample below:

<220> (this is a header only; it is mandatory whenever <221>, <222>, or
<223> is present)
<221> misc_feature
<222> 5 (gives location of the Xaa in the sequence)
<223> this line explains which residue(s) the Xaa represents

These errors appear in many of the submitted sequences, beginning with
Sequence 1.
